SUMMARY

CONSTRUCTION COST INDEX FOR SELECTED HIGHWAY CONSTRUCTION ITEMS

3rd QUARTER ENDING September 30, 2004

Index for this quarter.....	191.6
Index for last quarter.....	169.6
Point change from last quarter.....	+22.0
Percentage change from last quarter.....	+13.0%
Index for same quarter of last year.....	167.6
Point change from same quarter last year.....	24.0
Percentage change from this quarter last year.....	14.3%

Average number of bidders this quarter.....	3.68
Change in number of bidders from last quarter.....	- 15.8%

NOTE: All information shown in this publication was assembled using 1987 as the base year.

Colorado Construction Cost Index

Comments:

This Colorado Construction Cost Index is composed of six indicator items and based on bid prices relative to the unit prices of 1987 (unit index=100).

Earthwork (Excavation and Embankment):

The average price was \$4.38 a cu. yd. which is down \$1.46 from the previous quarter. Fewer projects with larger quantities contributed to this low price. About twice as much volume was accounted for this quarter as last quarter.

Hot Bituminous Pavement:

The average price was \$43.33 a ton which is up \$7.36 from the previous quarter. Higher oil prices, a long term warranty project, and fewer projects with smaller quantities contributed to this higher bid price. Price typically increases in the third quarter.

Concrete Pavement:

The average price was \$27.59 sq. yd. which is down \$0.83 from the previous quarter. This slight decrease can possibly be due to the fact that the majority of T-Rex concrete is complete contributing to an excess in supply.

Structural Steel:

The average price was \$2.70 a lb which is up \$1.98 from the 2003 year average price. Steel prices have increased due to higher manufacturing, supplier costs and increased worldwide steel demand. Also, there were no projects with significant steel quantities bid in the third quarter.

Structural Concrete:

The average price was \$350.71 a cu. yd. which is up \$52.79 from the previous quarter. The current quarter average price is considerably higher compared to the average bid price of \$289.44 a lb. for the entire year 2003.

Reinforcing Steel:

The average price was \$0.91 a lb which is up \$0.13 a lb from the previous quarter. Steel prices have increased due to higher manufacturing, supplier costs and increased worldwide steel demand.

ADDITIONAL INFORMATION:

For the 3rd quarter, the category indices showing an increase were Hot Bituminous Pavement, Structural Concrete, Reinforcing Steel, and Structural Steel. The Index level decreased for Earthwork and Concrete Pavement.

37 projects were bid and awarded this quarter for a total of \$80,131,767.58. By comparison, 49 projects were bid last quarter.

The six categories for CCI items totaled \$26,030,050.89 which is 32.5% of total awarded amount. The competition for projects decreased from 4.37 to 3.68 bidders for each project on average.

22 maintenance contract projects were bid this quarter. No metric projects were bid this quarter.

No Design/Build or Lump Sum projects were bid this quarter.
